# Agrisprime

## ABOUT THE COMPANY

AgrisPrime is a decentralized digital trading protocol developed by Agris, a digital software company located in Tallin Estonia. Founded in 1999 by Magl Sander and Oliver W.

AgrisPrime is a Defi yield harvesting protocol, which provides a maximum and sustainable APY (Annual percentage yield) trading system for digital assets including cryptocurrency, blockchain gaming, Memes, and digital real estate.

Leveraging the best of the team's years of experience in blockchain software, digital assets management, and fintech, AgrisPrime empowers millions of people to harness the value behind their crypto assets, shaping a new, better financial system.

# Agrisprime

## ABOUT THE COMPANY

AgrisPrime is committed to successfully creating the future of finance through innovative, convenient, and sustainable solutions. By harnessing the potential behind blockchain technology through decentralized finance and digital assets trading. We are pioneering a new digital finance yield system

We envision a future for the financial world where all digital assets ranging from cryptocurrency, digital real estate, NFTs, Defi gaming, and memes are all tokenized on-chain and people have efficient ways to grow, transfer and manage their assets and funds

AgrisPrime currently yields assets for top crypto tokens and high-performing memes - including real estate.

## **HOW TO COPY REFERRAL LINK**

Go to the User Dashboard  
Go to Referral Link and Copy

After years of development and planning, we have finally launched our Virtual Card system for the Agrisprime trading protocol.

This is the first of its kind with hybrid security analytics incorporated into this virtual card as promised by the developers. This card is meant to launch hybrid account owners into their own digital world with several technological upgrades ranging from personal server security, digital loan assessability and interoperability of finance on the digital space. The Agrisprime virtual card offers flexibility, simplified payments, speed, and Security.

The Agrisprime financial protocol is what keeps the system stable for long term productivity and workability. Following the protocol requirements all Agrisprime hybrid compounding portfolios are obligated to be connected to the protocol's Virtual card system for 100% efficiency and server optimization.

Agrisprime

# AQ VIRTUAL CARD

## WHY THE VIRTUAL CARD IS COMPULSORY FOR HYBRID COMPOUNDING ACCOUNTS

- 1. Security:** Large amounts of financial data is transferred across our hybrid servers on a daily basis, and if compromised by any slightest margin, will lead to catastrophic results for our platform. With the Zero Trust Security Model, our virtual card provides user level security clearance for every command initiated by each user for any transaction on the Agrisprime system. This is important for the protocol
- 2. Data Analysis:** Each user data is processed per trade cycle for insurance purposes, and the unlimited trade data in hybrid accounts can only be tracked with the help of a TMS, under the Mastercard and Paypal protocols, which are the major hosts for our virtual card system.
- 3. Speed:** Following transactions of huge financial data on hybrid protocols, there is bound to be a lag in server traffic during deposits and withdrawals as witnessed by members in the past. Our virtual card private key system ensures a decentralised format of command confirmations which speeds up the data processing system for faster command confirmations.

Agrisprime

## AQ VIRTUAL CARD

### THESE ARE OTHER BENEFITS OF THE AQ VIRTUAL CARD FOR EVERY CONNECTED MEMBER

- A. You can request and activate digital asset loan offers. The Agrisprime defi protocol provides virtual card users and hybrid accounts with access to cryptocurrency loans without need for collateral
- B. You can activate your cashflow to be able to withdraw your trading profits every 24hrs
- C. You can make online purchases with the virtual card key on any digital finance platform supported by Paypal and Master-card protocols

# Agrisprime

## AQ VIRTUAL CARD

This Virtual card serves as financial foolproof for capital flows for all connected accounts. This helps the company control capital flows and be able to stay afloat in the longer term against insolvency traps.

Each authorised member or account connected to each virtual card can make personalised transactions using the card number to generate a private key for each transaction they want to make.

Hybrid accounts will be considered first for any future developments and opportunities with Agrisprime.

### **COST**

Each AQ virtual card costs \$15,500 for virtual installation, Paypal and Mastercard server authorisation, and insurance clearance for loan assessment, activation of Mastercard costs \$8,500.
